Research Design

Six jurisdictions from across Australia (ACT, NSW, QLD, TAS, VIC, WA) as well as a national study was commissioned to investigate awareness and experience of information access rights amongst the general public.

Each jurisdiction had their own mixed study comprising of n=350, and n=405 nationally, amongst Australian residents aged 18+ years. The studies were conducted between May 14 and June 23, 2023 utilising an online panel and Computer Assisted Telephone Interviewing (CATI). A breakdown of respondents by jurisdiction is displayed below:

Federal Survey	ACT	NSW	QLD	TAS	VIC	WA
n=405	N=350	n=350	n=351	n=350	n=350	n=350

For each jurisdiction, quotas were set by state, gender, age and location (metro/regional when applicable), and data was post-weighted to reflect the latest ABS population estimates.

Due to rounding, percentages may not always add to 100.

Information from the Australian Government Information Access Study is presented as the 'Federal' total.

Information Access

Importance of Having the Right to Access Government Information

Majority of Australians (91%) indicated it is important to have the right to access government information. This is consistent across each of the jurisdictions.

Awareness of Right to Access Information

Awareness of the right to access information from Federal Agencies	Total % (n=405)
Total	60
Australian (Federal) Government department/agencies (e.g. Centrelink, Home Affairs)	54
Australian (Federal) Government – your personal information	40
Australian (Federal) Government – policy and procedural documents	33
Federal statutory bodies such as ACCC and ASIC	30
Australian (Federal) Government Ministers	22

60% of the Nation were aware of the right to access information from Federal agencies.

Averaging across states, roughly two thirds of respondents in 2023 were aware of their right to access information from the listed agencies.

Respondents from Western Australia were most likely to indicate their awareness of their right to access government information (72%), while Tasmanian respondents were least likely be aware (56%).

Attempts to Access Information in the Last 3 Years

Attempts to access information from Federal Agencies	Total % (n=405)
Total	27
Australian (Federal) Government department/agencies (e.g. Centrelink, Home Affairs)	24
Australian (Federal) Government – your personal information	10
Federal statutory bodies such as ACCC and ASIC	9
Australian (Federal) Government – policy and procedural documents	7
Australian (Federal) Government Ministers	5

On a Federal level, less than one third (27%) of respondents had tried to access information in the last three years.

The proportion of respondents who attempted to access information from government agencies varied between a fifth and two fifths, with NSW respondents most commonly requesting information.

Success in Attempting to Access Information

The majority of Australians were successful in accessing information from all Australian Government entities where access was attempted.

At a jurisdictional level, success in attempting to access information was similar across states, ranging from two thirds (68%) in ACT to close to four fifths (78%) in NSW.

Success in Attempting to Access Information

Federal Agencies Accessed

The majority of Australians were successful in accessing information from almost all Australian Government entities where access was attempted.

Respondents were less successful accessing information from Ministers.

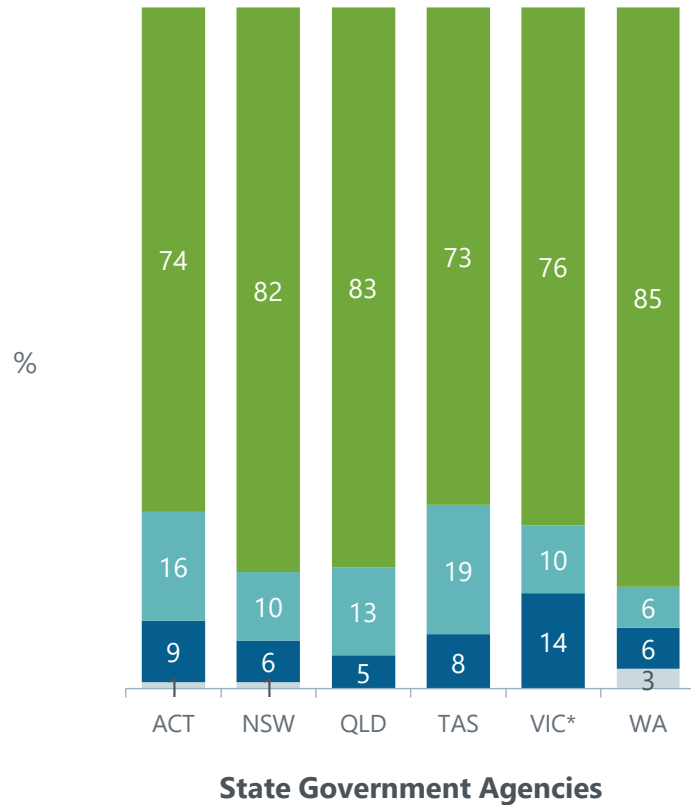

Q7. Were you successful in accessing information from ...? SR

Base: Respondents who had attempted to access information; 2019 n=369; 2023 n=110

Respondents who had attempted to access information Govt. agencies 2019 n= 272; 2023 n=99; Statutory bodies 2019 n=80; 2023 n=37; Personal Information 2019 n=92, 2023 n=40; Policy and Procedural documents 2019 n=53, 2023 n=27*; Ministers 2019 n=33, 2023 n=19*

*Caution: small base size, indicative only

Success in Attempting to Access Information by Agency

■ Yes
■ Partially
■ No
■ Other

The majority of respondents across states were successful in accessing information from states government agencies and local councils, with three quarters or more of respondents being successful in accessing information.

Q7. Were you successful in accessing information from ...? SR

Base: Respondents who had attempted to access information; State Government Agencies (ACT n=69, NSW n=96, QLD n=40, TAS n=37, VIC n=29, WA n=35), Local Councils (NSW n=72, QLD n=38, TAS n=37, VIC n=46, WA n=58)

Success in Attempting to Access Information by Agency

Over eight in ten respondents were at least partially successful in accessing information from public hospitals and health services.

Although fewer respondents requested information from public universities or TAFEs, most reported being successful in accessing that information.

Q7. Were you successful in accessing information from ...? SR
Base: Respondents who had attempted to access information; Public Hospitals & Health Services (QLD n=44, VIC n=32, WA n=51), Public Universities/TAFE (NSW n=30, QLD n=12*, TAS n=25*, VIC n=27*, WA n=17*)

*Caution: small base size, indicative only

Success in Attempting to Access Information by Agency

Success rates in accessing information from state ministers and their staff was lower and varied by state, though there was a small base size.

Success in accessing information from State Owned corporations was high across respondents from Tasmania, New South Wales and Western Australia.

All Victorian respondents indicated that they were able to successfully access information from government schools.

Q7. Were you successful in accessing information from ...? SR

Base: Respondents who had attempted to access information; State Ministers & their Staff (ACT n=18*, NSW n=17*, QLD n=5*, TAS n=6*, WA n=8*), State Owned Corporations (NSW n=26*, TAS n=13*, WA n=9*), Government Schools (VIC n=18*)

*Caution: small base size, indicative only

Demographics

Which of these categories best describes you?

What is the main language spoken at home?

Are you of Aboriginal or Torres Strait Islander origin?

Base: All respondents; Federal n=405, ACT n=350, NSW n=350, QLD n=350, TAS n=351, VIC n=350, WA n=350

Summary

Summary

The majority (91%) of Australians nationwide felt that their right to access information from government sources was very or quite important. This is consistent across the jurisdictions.

Roughly two thirds of respondents in 2023 were aware of their right to access information from the listed agencies within their respective jurisdictions.

- Respondents from Western Australia were most likely to indicate their awareness of their right to access government information (72%), while Tasmanian respondents were least likely to be aware (56%).

The proportion of respondents who attempted to access information from their respective jurisdiction varied between a fifth and two fifths, with NSW respondents most commonly requesting information. Nationally, less than one third (27%) of respondents had tried to access information at a Federal level in the last three years.

The proportion of respondents who attempted to access information from government agencies within their jurisdiction varied between a fifth and two fifths, with NSW respondents most commonly requesting information.

- Respondents tended to be more likely to have tried to access information from state government agencies and local councils.

Success in attempting to access information was similar across states, ranging from two thirds (68%) in ACT to close to four fifths (78%) in NSW.

The majority of respondents across the states were successful in accessing the information they were after, however were less likely to be successful accessing information from State Ministers and staff. At a Federal level, those least successful had attempted to access information from Federal Ministers.
